### GUESTS:

1. Kim Alexander-Yarbor, Solano County Counsel
2. Susan B. Anthony, Candidate for County Supervisor
3. Lee Axelrad, Solano County Counsel
4. Jill Firch, CalRecycle
5. June Guidotti, 3703 Scally Road, Suisun, CA 94585, Member of the Public
6. Melissa Murphy, The Reporter

1. **Call to Order / Introductions**

The meeting was called to order by Chair Dunbar 9:07 a.m.

2. **Public Comment**

The following is verbatim testimony.

Guidotti: "O.K. Mr. (unintelligible) is here. I was a little disappointed that Bill Reustle's letters got left out, but Narcisa has them locked up in her cabinet there that's not for public review. And I would like to add on public comments that none of this is in the general plan and plus I will provide the Board with the law finders six, six, six that states that BCDC's attorney, attorney in general, attorney general was dismissed yesterday on the lawsuit, on the case that is being sent to back to Judge Beeman so the recycling coming in from Jim Dunbar should be put on hold. Also that is not included in today's siting element and that is Harry Englebright, Axray (?) in the general plan, Mark DuBee (?) of CWMB and the energy element. One hundred pages in two thousand and two was left out on Guidotti's vested rights on the power plant. And I provided you with the six, six six on the, on the law finders that there is an alternative. Also Hay Road Landfill and Potrero Hills and the odor. I'm submitting a paper into Ed Padilla today in regards to there wasn't included in the general plan and I guess the key thing is, is that there have the, it's the composting...I don't have... O.K. it's on the Calpine's power plant that I will submit to the paper into Jim Dunbar today. And on the Calpine's power plant... Narcisa does not have it in the general plan. It was never put in the general plan and there is no marsh development permit because it's all kinda over in Fairfield that's it's actually in the Suisun Marsh. Larry Burch's engineered letter showing that there's no... that they can't control the litter of the site or the odor. No marsh development put on CEQA on Perdilla (?) Road either. Harry Price's Suisun Marsh (unintelligible) for the public and the right and anything for the public. The STA meeting last night wasn't disclosed that Sue Villara (?) works for Solano Garbage Company and for Potrero Hills. Her husband is now the mayor for Harry Price and Jim Dunbar's wife was an attorney. Her boss, her partner is now on the board also for the Solano Planning Commission. And it's not in the general plan. All of this on our zoning changes and what you are proposing to do here today.

3. **Action Item(s)**

a. **Approval of the Minutes**

The minutes of January 19, 2012 were approved.

b. **Authorize Chair to sign and submit letter to Staff containing the LTF's final comments on Solano County's Third 5-Year Review Report on the Countywide Integrated Waste Management Plan in accordance with title 14 CCR, Section 18788.**

Chair Dunbar read aloud a comment letter submitted by Ms. Guidotti dated February 27, 2012. Lee Axelrad re-stated that the question raised in the comment letter was, "Should Ms. Guidotti's proposed demonstration project somehow be included in the 5-Year Review and more specifically in the Siting Element?" and responded that in approving the action before the LTF today that the members would in no way be precluding Ms. Guidotti from bringing forward her proposal in the future.

This was followed by a question by Chair Dunbar in which Mr. Axelrad responded that CalRecycle has up to 120 days to review the report.

Narcisa Untal restated the LTF's collective comments and action would be included in the submittal to CalRecycle on April 1. Secondly, the Countywide Siting Element was scheduled to be heard by the City of Vallejo however their counsel determined that they were outside the 90 day comment period and thus it was automatically approved by default.

The hearing was opened to public comment.

The following is verbatim testimony.

Guidotti: "I request that you deny this today on where you're approving a 5 year of renewal for the Siting Element. And the reason I ask you to deny it because everything's being sent back to this county. Yesterday's hearing in San Francisco that's one reason. Second thing is I have to go back to nineteen... two thousand and two because CalRecycling put out a 100 page document disclosed... taking out my parcel and giving it to Calpine off Cordelia Road which is Bill Gates. This doesn't have a siting element this does not have a Suisun Marsh permit. Something's going to have to be fought in court and as I tried to explain to you that the (unintelligible) law. The attorney general has to file this cease and desist. You can go and find this on your internet. There's 30 pages that'll tell you that what I propose to do has superior alternatives and merit over everything that's being done. Hay Road, Solano Garbage Company, Potrero Hills, whatever. I ask you not to put this through because it could be overturned by the attorney general and BCDC. So I think it's the horse before the cart. I think... Bill Reustle put in his letters, which you didn't get to see. He basically said that. There's things that has to be done such as Diane Feinstein has Delta Stewardship ... this is a chemical pond. This is over my fence line. This no longer is there. I was threatened to be put into this and this pond is leaking down into the Suisun Marsh. Potrero Hills Landfill, Solano Garbage Company is leaking toxins. Jane Bogner and the Solano Land Trust are mitigating ... getting money. Getting money for mitigating. None of this land, hundreds of acres around my parcel, Tonessons Pet Cemetery ... None of this has been included in the Delta Stewardship plan. It will be in there. They will go in and remove this. They're going to stop the methane gas from leaking onto my parcel. There's a lot of things that I'm very angry about. That they continue to hide and I've got it fixed so I'm requesting you to deny this. You can do it in six months. There's the paper. We're going to have the hearing in six months. What's your big rush? 120 days ... it'll still be overturned. I request that you get more information and you deny this 5-Year Review right now because there is a superior alternative that's not in there." Copies of documents brought to the meeting by Ms. Guidotti were passed around the room.

There being no further comments Chair Dunbar called for a motion to authorize the Chair to sign and submit a letter to Staff containing the LTF's third 5-Year Review Report on the Countywide Integrated Waste Management Plan. Jane Bogner, Sierra Club, stated that she would offer the motion. The motion was

seconded by Ed Padilla, Solano County. There being no discussion from the LTF members Chair Dunbar called for a vote. The motion passed unanimously.

**4. LTF Member Training – Brown Act**

Pursuant to the Solano County Board of Supervisors policies and procedures, every member of a Solano County legislative body must receive training on the Brown Act. This training was provided by Kim Alexander-Yarbor, Deputy County Counsel for Solano County.

**5. Recycle Guide & Earth 911.com**

Bogner reviewed changes to the Recycle Guide and announced that the information in the Recycle Guide will be incorporated into a website called Earth911.com.

**6. Member Updates**

**Solano County**

Narcisa Untal reported on upcoming events: Youth Ag Day, Household Haz Waste Info Exchange, Green CA Summit, Rx Drug Take-Back Event and the Used Oil/HHW/WSPPN Conference. The Mower Exchange will begin 4/16/12. The Tire Amnesty program has spent less than \$10,000 and has collected nearly 13,000 tires. Solano County has requested an extension to the tire amnesty grant so the program can continue beyond June 2012.

**City of Vacaville**

Kari Holmes announced that Vacaville will hold a pharmaceutical event on Saturday, May 12, from 9:00 to 3:00 for Vacaville residents only.

**Allied Waste**

Marie Knutson announced that they were holding a compost class at the community gardens on April 14<sup>th</sup> at 9:00am. At noon they will have a finished compost give-away at their corporation yard.

**Solano Garbage Company**

Sandra Gonzalez announced that Solano Garbage was planning a food waste program.

**VALCORE**

Mark Nichols announced that he has free trays from Recology Vallejo to give away. He also has three pallets of vials from Vacaville. There will be a worm café open at the Youth Ag Event in conjunction with Master Gardeners. Vallejo's Earth Day (4/21) will again have a Scrap Art Sculpture contest.

**CalRecycle**

Jill Firch reported on a calculator for businesses to use for the commercial recycling program.

**Potrero Hills**

Jim Dunbar reported that the landfill received its final expansion permits and is moving forward to put the permits in place. Potrero Hills along with 3 other local businesses are planning an Earth Day event for the City of Fairfield on April 22<sup>nd</sup>.

6. **Adjournment**  
There being no further business the meeting was adjourned at 10:44 a.m.

RE: June Guidotti facility

Dear Chairperson Dunbar:

Mrs. June Guidotti, once again, objects to the siting element as written. Please refer to my letters of 12/1/2010 and 2/12/2010.

Please make the corrections to include the demonstration project for a waste to energy plant to be sited upon the Guidotti property as was originally required in the Solano Garbage Company Permit in 1984, and which has been continued to this day. Although this was a condition to obtain the permit, such a project never materialized: why should they? They had their permit, which was all they wanted anyway.

Mrs. Guidotti wants to take this opportunity to get her long-stalled project realized. This is a superior location to others proposed. Mrs. Guidotti reserves the right to supplement or modify this objection as conditions necessitate.

Sincerely,

  
WILLIAM S. REUSTLE

RE: June Guidotti facility

Dear Chairperson Bogner:

We note that the task force Siting Element has once again neglected to include June Guidotti's proposed waste-to-energy conversion facility. This is unfortunate.

You should be aware that Ms. Guidotti applied on August 24, 2007, for a permit for a research study to be sited on her property adjacent to the Potrero Hills Landfill. This site was a *required element* included and identified in the permit process for Solano Garbage Company as long ago as 1984. Although Solano Garbage never followed through with that requirement once their permit was granted. I refer you to Solano Garbage Company Landfill EIR dated January, 1993, Page 3-27 (5) Bonnici Project which is attached hereto for your convenience. Now that Solano Garbage Company's name is being removed from the paperwork designations it is imperative that June Guidotti's portion should not simply perish as well. This is still a viable project that should be allowed to go forward as an environmental improvement to the entire area.

Please see to it that this project is included in the Countywide Integrated Waste Management Plan. If there are any other requirements that should be followed up, please so advise.

Further, please see to it that June Guidotti at 3703 Scally Road, Suisun, CA 94585 is included in the mailing list for all LTF activities, meetings, and actions as she desires to follow through on the activities that affect her property and property value.

Sincerely,

WILLIAM S. REUSTLE

Solano County Resource Management  
Attn: Narcisa Untal

RE: Countywide Siting Element

Gentlemen:

On behalf of Mrs. June Guidotti, a Solano County resident with substantial property in the Suisun Marsh buffer zone. My client is deeply concerned about the proposed changes in the Countywide Siting Element.

It is noted that the Figure IV-2 was referenced on pages 11 and 15 but that figure was not included in the package as disseminated. The triangle was shown on the Griffith Ranch (representing a solid waste facility) whereas it should be indicated near the flare on the phase one PHL site.

Mrs. Guidotti requests that her proposed thermal electric transformation plant as proposed be included in the new siting element as previously requested in public hearing on June 17, 2010. It is contended that this plant is of greater merit than any other proposed plants, ie. Solano Garbage Co., Potrero Hills, Tonnesen. Environmental considerations promote the conversion project as a way to efficiently eliminate much of the materials that otherwise simply adds bulk to the land-fill. This problem can be minimized by converting biomass to electrical energy, a very 'green' concept. Mrs. Guidotti would entertain locating a test facility on her lands to scientifically determine the feasibility of such operations.

Objection is hereby made as to permitting of the Tonnesen Pet Cemetery. This project was allowed to proceed in violation of existing requirements based on a faulty LEA Advisory No. 12. That advisory was rescinded in 2004. Thereafter the facility has operated sans permit in what can only be described as an illegal operation. Suisun Marsh must be protected and this operation has the potential to denigrate water quality and to contaminate marsh lands with runoff. My client is concerned that any contemplated changes to the Tonnesen operation could allow an expansion of activities, including incineration, contrary to the original 'permit' and the Marsh Protection Plan. If the operation is transferred to the ten-foot contour line, as shown on Figure VI-1, further damages are likely to the Suisun Marsh and surrounding lands. Leakage from the site is not adequately monitored for temperature or water quality or soil contamination. CEQA

requirements have not been met. There is no EIR. Furthermore, page 23, Chapter 5 of the Preliminary draft specifies that "new or expanded solid waste disposal sites shall be located further than 10,000 feet from airport runways" .... Mrs. Guidotti questions the location of the Tonnesen facility as being too close to the Travis AFB runway.

Recent events affect seriously the need for some of the proposed changes. The May 12, 2010, court decision that Measure E *must* be enforced by the county has a major effect on the Potrero Hills Landfill. The siting plan document assumes approval of the PHL expansion which is very much in doubt. No new roads should be allowed, even calling them 'fire roads' does not abrogate the need to maintain the Marsh in a pristine state.

A study should be undertaken to fully explore the alternatives before locking in a Plan that does not address my client's vested rights or the best interests of the public. Attached hereto is a copy of a portion of the official Solano County map showing the Guidotti property designated as a solid waste facility.

Mrs. Guidotti reserves the right to amend or supplement the public record on these matters.

Sincerely,

WILLIAM S. REUSTLE

Dear Frank:

I contacted BCDC concerning the Bonnici property to determine whether it is within their jurisdiction.

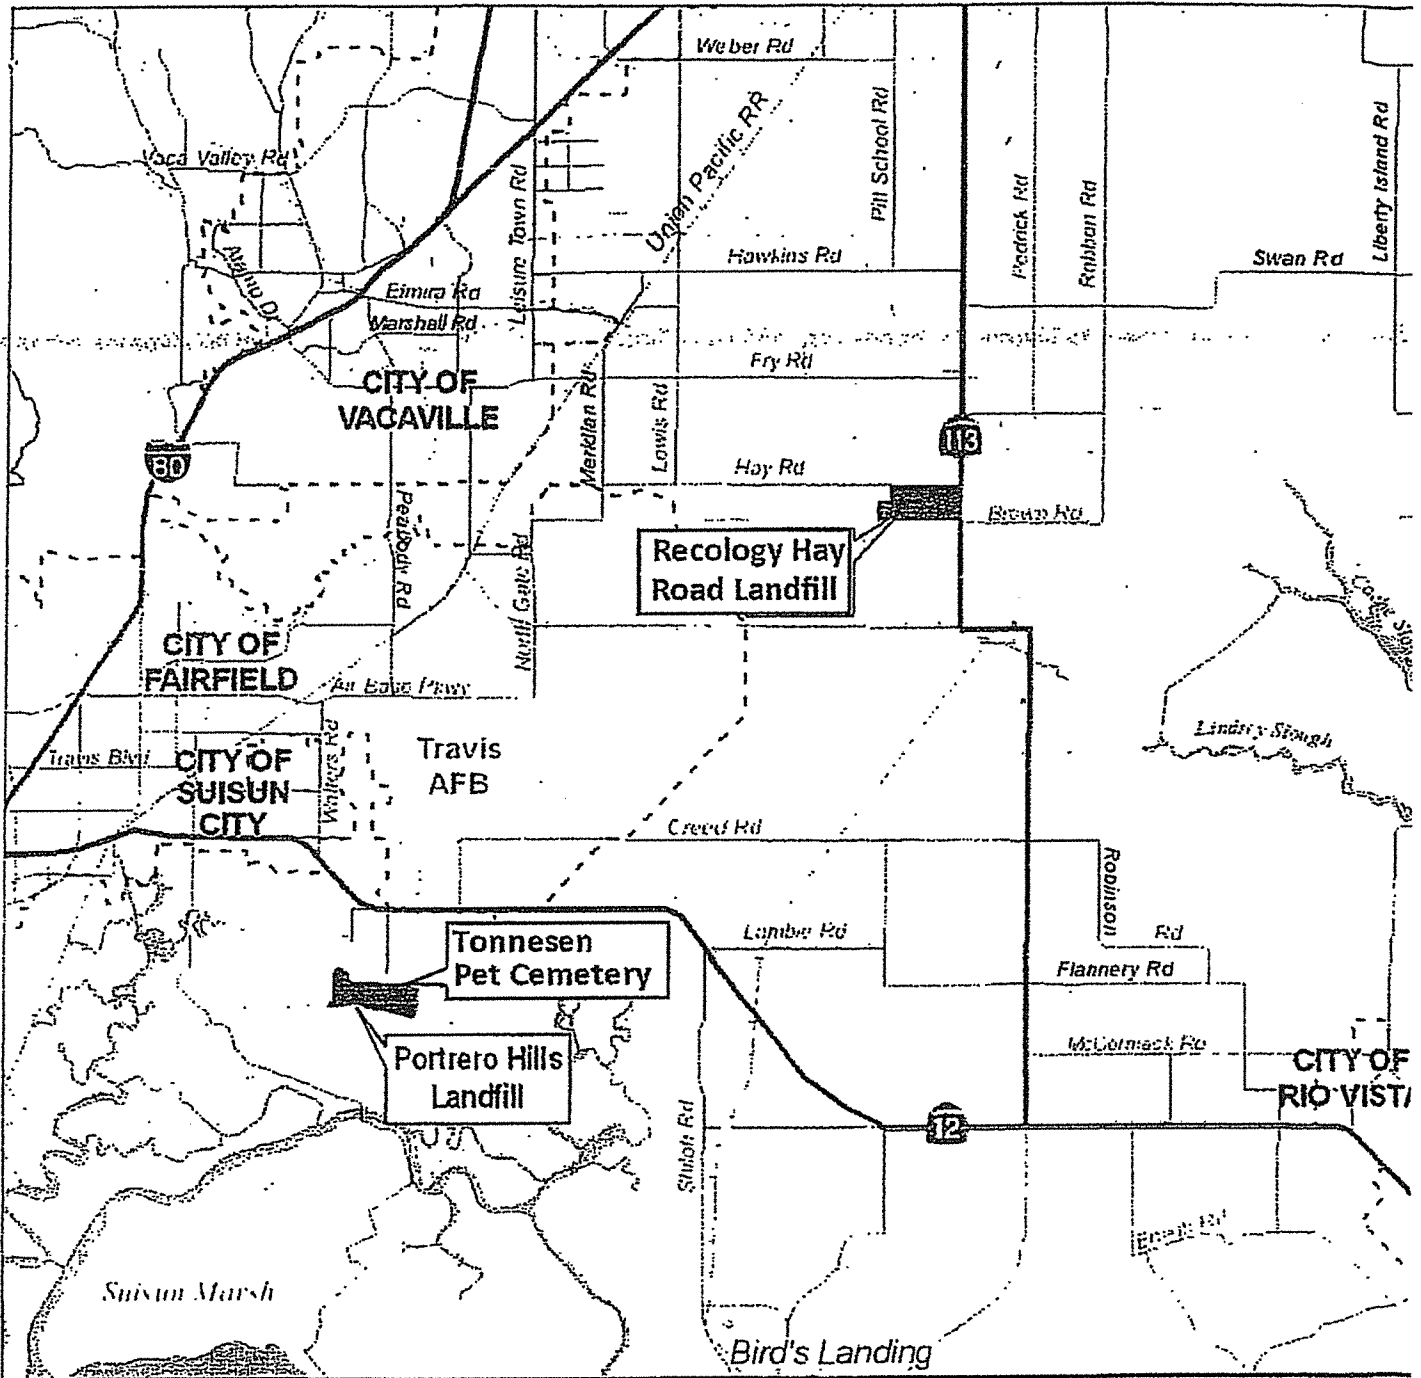

It is not, however he points out that the site is within the "buffer zone" as outlined in the Suisun Marsh legislation adopted by the State Legislature. I am enclosing a copy of Alan Pendleton's letter.

As you know, as a member of the Solid Waste Study Committee, that area is to be a major waste disposal area. I believe it can be worked out.

Sincerely yours,

F. R. HENREIN
