

REBUTTAL TO OPPOSITION TO MEASURE H

Solano County residents have made it clear that fixing our local streets and roads is their top transportation priority. We agree and take this responsibility very seriously.

How are we supposed to do this without funding? We have lost over 25% of funding from the state – a cut of more than \$5 million. We are doing everything we can to fix our local streets and roads, but we need more funding.

All funds raised by Measure H will be directed by Measure G for local street and road repair, fixing potholes, road safety, and transportation for seniors and people with disabilities.

Measure H will expire in 5 years. All the revenue generated will stay right here in Solano County to fix our local roads – none of these local funds can be cut or taken by the state. All funds will be spent in accordance with Measure G – fixing our local streets and roads, improving road safety, and supporting transportation for seniors and people with disabilities. Audits of funding will be published annually.

We support Measure G and Measure H because together they will give us the tools we need to repair our local streets and roads. Half of our local streets and roads are already in poor or at risk condition. This hurts local businesses and residents. Measure H will provide the funding we need to fix our local streets and improve safety.

Join us and vote YES on Measure H.
