

MEASURE D
CITY ATTORNEY'S IMPARTIAL ANALYSIS

Measure D is an advisory measure which has no legally binding effect. Instead, Measure D seeks the opinion of the voters of the City of Benicia regarding the number of retail cannabis businesses in the City.

Currently, Benicia Municipal Code section 17.84.050 limits the number of retail cannabis businesses in the City to one business. Measure D asks voters whether or not they would support increasing the number of retail cannabis businesses to allow for more than one business in the City. Measure D cannot legally increase the number of retail cannabis businesses in the City.

If Measure D is enacted, the City Council may, but would not be required to, amend the Benicia Municipal Code to allow for more than one retail cannabis business in the City.

What Your Vote Means:

A "Yes" vote by a majority of those voting on Measure D would indicate to the City Council that voters want more than one retail cannabis business in the City of Benicia. A "Yes" vote does not automatically increase the number of allowable retail cannabis businesses.

A "No" vote by a majority of those voting on Measure D would indicate to the City Council that voters do not want more than one retail cannabis business in the City of Benicia. A "No" vote does not reduce the number of allowable retail cannabis businesses, and one retail cannabis business would still be allowed in the City of Benicia.

The above statement is an impartial analysis of Measure D. The full text of the measure is included in this voter information guide.
