

SOLANO COUNTY WATER EFFICIENT LANDSCAPE ORDINANCE

Effective January 1 2025, Solano County requires landscaping projects to comply with the state's water efficiency standards. New landscape projects with total landscape area at least 500 square feet or renovated landscapes at least 2500 square feet are required to submit an application for approval prior to project installation.

APPLICATION PROCESS:

- Full Compliance Package: For larger projects (greater than 2500 sqft), a comprehensive landscape design plan created by a landscape professional and a soil report is required. An irrigation audit report and site inspection by Solano County staff is also required.
- Alternative Compliance Package: For smaller projects (500-2500 sqft), an abbreviated design plan can be submitted by the homeowner/contractor. No site inspection will be required.
